

Connecting Your CasebookConnect Products to Canvas

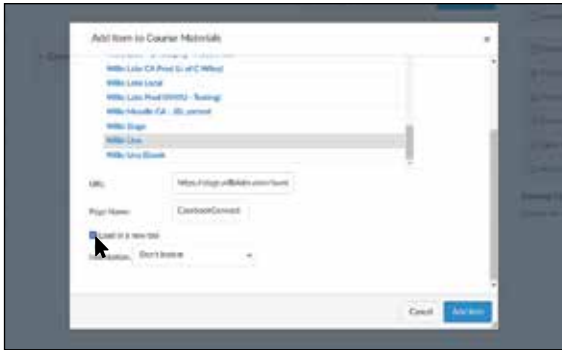

Learn how to set up your connected casebook, your Connected Quizzing class, and PracticePerfect for your students to access. Your institution must be in contact with Wolters Kluwer to make the integration possible.

Creating a Module Item

First, log in to your account on Canvas. In your class, click the “add” icon in the module. In the pop-up, select “External Tool” from the dropdown menu of possible items to add. Then, from the list of tools, scroll to find and select “Willo Uno.”

Module Item Details

Configure your module item using the following information.

- **URL.** Copy and paste the Launch URL provided by Wolters Kluwer, which is specific to your product, Connected Quizzing class, and institution.
- **Page Name.** We suggest the title of the book or product you’re using or “CasebookConnect.”
- **Load in a new tab.** Check this box so that you and your students have the best CasebookConnect experience.

When you’re finished with your configurations, click “Add Item.” Then, publish this module item by clicking on the “crossed circle” symbol next to the module item.

Connecting Your CasebookConnect Account

Click on the module item you created, click the button to load the URL in a new window, if selected, then log in to or create your CasebookConnect account. Once you’ve tied your CasebookConnect account to Canvas, you can use the module link to go directly to the product, or you can log in at CasebookConnect.com.

Grade Sync

Student Name	Score of 100	Percent Submitted	Assignments	Total
Case Studies				
Quiz Item	100	75	80%	80%

Once your product is set up and published for students, grades will begin flowing in automatically. In the “Courses” submenu, click “Grades.” Any quizzes your students have submitted through Connected Quizzing or PracticePerfect will display in the table on this page.
